MAPPING EXPERIENCES IN EUROPE RELATED TO THE PROVISION OF HEALTHCARE TO RETURNEES¹

CONTEXT

In the framework of the project “*Health and Return of illegal residents: best practice for basic requirements in the provision of health care to returnees (voluntary and forced), with a particular focus on vulnerable groups (women, children and disabled persons) prior to departure*”, and during the kick off meeting held in Verona, 21-22 January 2008, it was agreed to design an ad hoc questionnaire, for mapping experiences in Europe on the provision of healthcare to returnees.

BACKGROUND INFORMATION

- On 17 April 2007 the European Commission awarded a **Grant Agreement Contract (Ref: Grant Agreement Number – JLS/2006/Return/028)** “Health and return of illegal residents: best practice for basic requirements in the provision of health care to returnees (voluntary and forced), with a particular focus on vulnerable groups (women, children and disabled persons) prior to departure” to Ulss 20 Verona and a group of leading European partners.
- The **specific objective** of the project is to identify Best Practices in the Member States in the provision of health care for returnees, with a particular focus on vulnerable groups (women, children and disabled persons), prior to departure from country of illegal residence.
- One of the activities foreseen by the project is to carry out a **mapping exercise of experiences in Member States and third countries** (e.g. pilot projects) and documents (e.g. protocols) with relation to the provision of healthcare to returnees.

PURPOSE OF THE MAPPING EXERCISE:

1. To collect individual experiences at all levels (local, regional and national) on practices relating to the provision of healthcare to returnees.
2. To consolidate information in an easily consultable inventory to be uploaded on a future website (URL TBD) for consultation.
3. To provide a resource tool for key stakeholders operating in the field of illegal immigration and return.

¹ A returnee is a person who undergoes the process of return, defined as follows: “The process of going back to one’s country of origin, transit or another third country, including preparation and implementation. The return may be voluntary or enforced.” (Ref: Communication from the Commission to the Council and the European Parliament on a Community Return Policy on Illegal Residents) COM(2002) 564 final

INSTRUCTIONS

- The present questionnaire serves to collect information about experiences in Europe related to the provision of healthcare to returnees, in order to come up with a comprehensive mapping.
- The questionnaire is self-administered and Ulss 20 Verona is responsible for the supervision and distribution to appropriate parties/participants.
- The questionnaire should be completed according to the notes provided below and one questionnaire format should be used for each documented individual experience.
- Each questionnaire has a box in the upper right that needs to be filled out by participants with the following information: country where the experience occurred and questionnaire number (e.g. questionnaire 01, 02, etc.). Please see example below:
